

# Navbar

Navbars are a common UI component that provide users with a quick, familiar way of navigating around our website.

- **Navbar** the main container
  - **Navbar-brand** the left side, always visible, which usually contains the logo
    - **Navbar-burger** the hamburger icon, which toggles the navbar menu on touch devices
  - **Navbar-menu** the right side, hidden on touch devices, visible on desktop
    - **Navbar-start** the left part of the menu, which appears next to the navbar brand on desktop
    - **Navbar-end** the right part of the menu, which appears at the end of the navbar

➤ **Navbar-item** each single item of the navbar, which can be either be an a or a div

- **Navbar-link** a link as the sibling of a dropdown, with an arrow

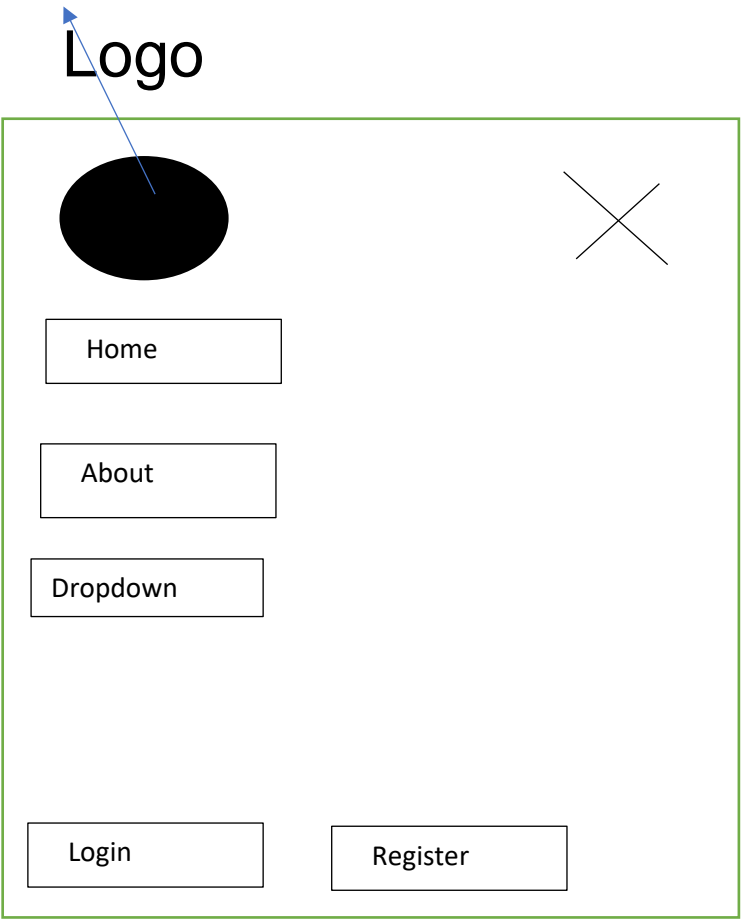

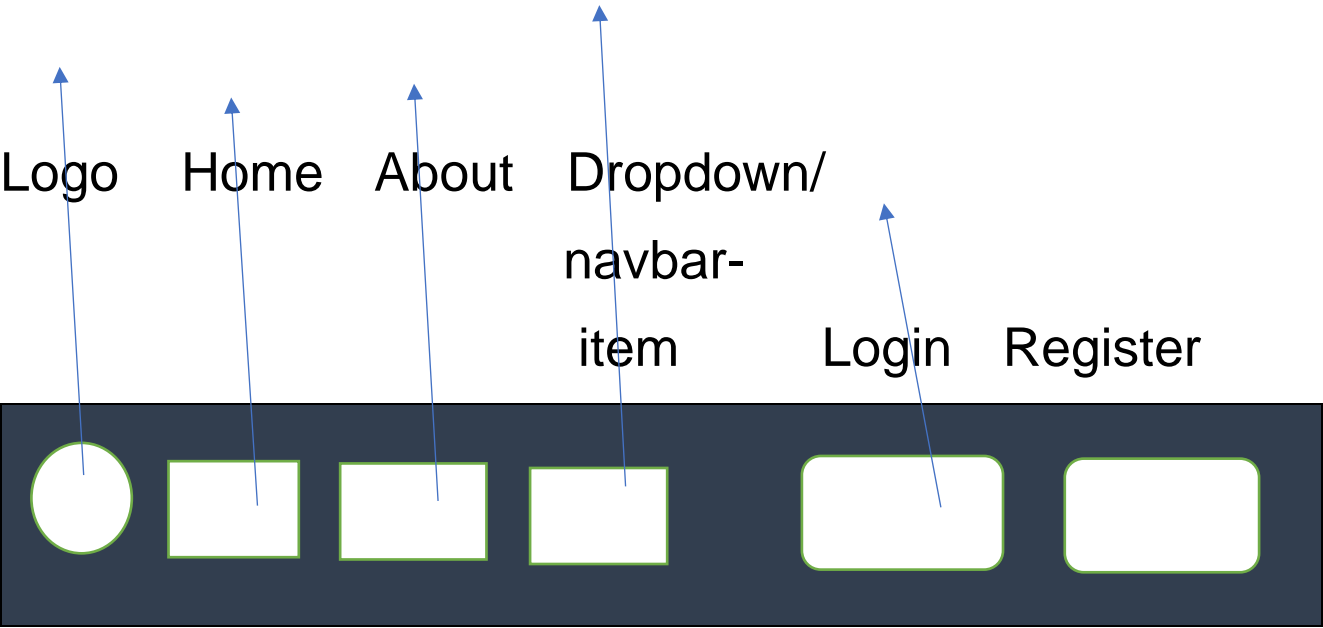

- **Navbar-dropdown** the dropdown menu, which can include navbar items and dividers

- **Navbar-divider** a horizontal line to separate navbar items

For example:

[Type here]

[Type here]

## Fixed navbar

regular fixed navbar at the top of the browser.

```
<nav class="navbar is-fixed-top">
```

## Navbar-brand

```
<nav class="navbar" role="navigation" aria-label="main navigation">
```

```
  <div class="navbar-brand">
```

```
    <!-- - navbar-items, navbar burger ... -- >
```

```
  </div>
```

```
</nav>
```

## Navbar-burger

It has to contain 3 empty span tags in order to visualize the hamburger lines or the cross(when active).

```
<a role="button" class="navbar-burger" aria-label="menu" aria-expanded="false">
```

```
  <span aria-hidden="true"></span>
```

```
  <span aria-hidden="true"></span>
```

```
  <span aria-hidden="true"></span>
```

```
</a>
```

## Navbar menu

```
<div class="navbar menu">
```

[Type here]

## Navbar start and navbar end

```
<div class="navbar-start">
```

```
<!-- navbar items -->
```

```
</div>
```

```
<div class="navbar-end">
```

```
<!-- navbar items -->
```

```
</div>
```

## Navbar item

A Navbar item is a repeatable element that can be:

- A navigation link

```
<a class="navbar-item">Home</a>
```

- A container for the brand logo

```
<a class="navbar-item"><img src="" /></a>
```

- The parent of a dropdown menu
- A child of a dropdown menu
- A container for almost anything you like, for example login or registration button

## Dropdown menu

- `navbar-item` with the `has-dropdown` modifier
- `navbar-link` which contains the dropdown arrow

[Type here]

- navbar-dropdown which can contain instances of navbar-item and navbar-divider
